DISCLOSURE

THE SELECTED BUILDING ELEMENT ENCOMPASSES AND DISPLAYS THE CONCEPTS OF ENVELOPE, OPENNESS, TRANSPARENCY, SCALE, EXCHANGE AND TIME. THESE ARE SUPPORTED THROUGH ITS ACCORDION MECHANISM ALLOWING CUSTOM AND PRECISE OPERABILITY FOR THE MERCHANT, STRENGTHENING EXCHANGE AND TIME AT THE FOREFRONT.

AS POINT (A) PIVOTS, POINTS (B) & (C) ARE DIRECTLY IMPACTED, AS THE SPACE BETWEEN THEM (D) INCREASES/DECREASES. THIS ENCAPSULATES TIME THROUGH THE SIMPLE NOTION OF OPEN AND CLOSED, DIRECTLY INFORMING HOW THE PROCESS OF EXCHANGE IS PERFORMED. IT IS THEN INFINITELY REPEATED, THUS CONSTANTLY REVEALING AND CHANGING A DEGREE OF EXCHANGE.

Disclosure

noun

the action of making new or secret information known.

Disclosure re-imagined takes the form of an underground atrium which focuses on the elements of exchange, alongside "on/off" programs. When "on" is a hub of activity and exchange of goods and services, the atrium houses bars enabling social drinking interactions and possibly toxic behaviour. When in the "off" alignment, disclosure is revealed yet inaccessible to the user; simply a glass surface to be walked upon. Disclosure relates to the transparent change of our initial element, and that correlation of activity.
