TWO WAYS OF ACCESS

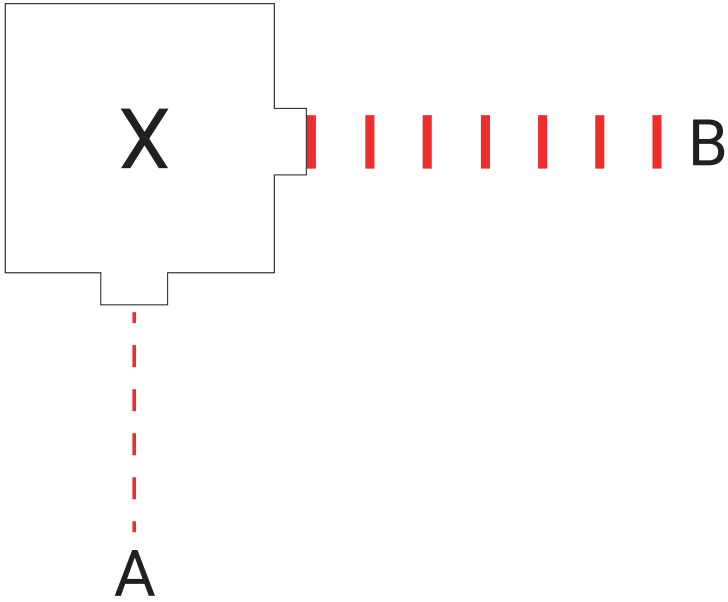

The entrance of the Uniting Church Center promotes a comprehensive level of accessibility. The system provides two ways of access into the building, both work in an equivalent function to transit from external to internal space. The diagram above uses letters to represent the start point from different position, and demonstrates both pathways ultimately leads into 'X'.

TWO WAYS TO DROP-OFF

In the following drawing, the two-way system is reimagined in the context of a ski resort. The site provides people with two ways to access the drop-off zone 'x' through ski lifts and a mountain road.
